

# Justice Bajeri

## FULL-STACK SOFTWARE ENGINEER

### SUMMARY

Passionate Frontend Engineer with professional experience in developing production applications using ReactJS, NextJS, JavaScript, and TypeScript. Proven ability to enhance user engagement and satisfaction, demonstrated by a 25% increase in user engagement and a 10% improvement in ease of navigation. Expertise in translating UI mock-ups into pixel-perfect implementations and optimizing user interfaces. Highly organized, capable of managing multiple projects simultaneously, and adept at providing insightful code reviews, consistently meeting deadlines, and exceeding expectations

### EXPERIENCE

#### Brussel Lake Paragon – London, United Kingdom (Remote)

##### Full-Stack Developer, March 2025 – Present

- Led the development of 10+ client projects, transforming early-stage ideas into production-ready applications.
- Built and delivered **5+ MVPs from scratch**, helping startups validate ideas quickly and efficiently.
- Designed and implemented **scalable backend systems and APIs**, ensuring reliability under real-world usage.
- Collaborated with cross-functional teams to ship features fast without compromising performance or code quality.

#### Juubix, London, United Kingdom

##### Frontend Developer, Smart contract developer, October 2023 – April 2024

- Developed a smart contract that facilitates agreement between investors, companies, and talents, improving 80% engagement of the platform.
- Designed and implemented responsive front-end features, improving user engagement by 25% and reducing bounce rates by 15%.
- Worked closely with the UI/UX team to optimize the user interface, resulting in a 10% improvement in user satisfaction and ease of navigation.

#### Singularity, London, United Kingdom

##### Frontend Developer, January 2023 – December 2023

- Collaborate with product and design managers to develop and implement UI designs using Next.js and Tailwind.
- Transform UI/UX design wireframes and mockups into fully functional software solutions, ensuring a seamless user experience and adherence to design principles.

#### Microverse, San Francisco, United state

##### Full Stack Code Reviewer, March 2023 – February 2024

- Conducted 100+ code reviews for junior developers' web projects, fostering growth through targeted feedback.
- Recognized for impactful feedback, achieving a 90% quality check score, and proven expertise in mentoring junior developers.
- Recognized as a top-performing code reviewer among a competitive pool of 200+ reviewers, showcasing exceptional attention to detail and insightful assessment skills.

#### Remote, Full-stack web developer

##### Freelance Consultant, August, 2022 – Current

- Orchestrated end-to-end website development by transforming mockups into responsive web interfaces using React, NextJS, JavaScript, and NodeJS, resulting in a successful launch of 15 visually appealing and user-friendly websites.
- Skillfully managed diverse functions and roles concurrently, meeting 100% of project deadlines and consistently exceeding organizational expectations across 20+ projects.

### SKILLS

**Front-End:** JavaScript, TypeScript, React, Redux, Zustand, React Query, NextJS, HTML5, CSS3, Tailwind

**Back-End:** Ruby, Rails, PostgreSQL, NodeJS, Express, MongoDB

**Tools & Methods:** Docker, AWS, Git, GitHub, Vercel, Netlify, Mobile/Responsive Development, RSpec, TDD, Chrome Dev Tools, ClickUp, Jira

**Professional:** Attention to Detail, Self-Motivated, Problem-Solving, Dependable and Responsible, Teamwork and Collaboration, Flexible and Adaptable

### PROJECTS

#### [Epickset](#)

- Built a collaborative platform enabling artists and bands to create, manage, and refine setlists using AI-assisted workflows.

- Developed features for AI-powered setlist generation, music uploads, collaboration invites, and feedback systems.

- Improved AI response consistency and prompt handling to deliver more relevant and personalized user experiences.

- **Built with:** Next.js, Node.js/NestJS, PostgreSQL, AWS, and Tailwind.

#### [Property Investor Africa](#)

- Built a real estate investment platform featuring secure "deal rooms" for private negotiations between investors and developers.

- Designed a structured request-matching workflow allowing investors to post property demands and developers to respond with relevant opportunities.

- Implemented secure document-sharing and role-based communication systems for privacy and efficient collaboration.

- **Built with:** Next.js, Node.js/NestJS, PostgreSQL, AWS, and Tailwind.

## EDUCATION

MICROVERSE, August, 2021 – August, 2023

### Remote Full Stack Web Development Program, Full-Time

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.

### [Juubix](#)

- The future of digital matchmaking! The Web3 'Tinder' Ecosystem & Financial Marketplace. Matching Talent, Companies, and Investors anonymously based on key interests, skills, and finance/funding needs in a Web3 gamification environment.

- **Built with:** React, Redux, NextJS, Tailwind, TypeScript, Node, Express, NestJS, MongoDB, Solidity/Smart contract, and Ethers.js.
